Boss Products

Cobalt Drill Bits featuring Grizzly Tip

All bits are packaged for easy retail.

FEATURES**GRIZZLY TIP**

Grizzly Tip™ is exclusively available from BOSS. It has excellent self centering characteristics. The center split point starts the cutting with the two sides (tips of the flutes) following close behind it providing 4 cutting edges. This increases the speed and smoothness of the drill and hole.

**SOLID CONSTRUCTION**

M35 is a high speed steel in the tungsten molybdenum series with 5% cobalt added. The additional cobalt increases heat resistance. The carbides in its are small and evenly distributed. It has high wear resistance. After heat treatment, its hardness is the same as T1, but its bending strength can reach 4700 MPa. It's toughness and thermo plasticity are higher than T1 by 50%.

**3 GROUND FLAT**

The triangle shank is made by machining three flats on a round bar stock. It is intended as a minor modification of a straight shank, still allowing it to be held in a 3-jaw drill chuck, also allowing higher TORX transmission and limited slipping.
